## OVERVIEW

I am a motivated and dynamic web developer dedicated to delivering interactive, user-friendly, and feature-rich websites and applications. With a keen eye for detail and analytical skills, I strive to provide original and efficient web solutions. I possess technical knowledge and enjoy working with others, allowing me to meet production deadlines while maintaining a passion for my work. My self-motivation and strong organizational and time management abilities allow me to effectively manage my workload and deliver projects on time. With experience in various programming languages and technologies, as well as expertise in creating responsive websites, I am confident in my ability to provide high-quality work.

## PROFESSIONAL EXPERIENCE

### Freelance / Frontend Developer

Jan 2023 – Current | Dallas, TX USA

- Collaborated with clients/content owners to understand their requirements
- Managed expectations of clients/content owners
- Developed system/design solutions for both existing and new websites and presented a new UI and templating system with Bootstrap and JavaScript
- Advised clients on reducing page loading time
- Achieved a 20% reduction in page loading time through JavaScript compression and CSS minification

### Intern Evangadi-Tech/ Software Developer

April 2022 –2023| Dallas, TX USA

- Built responsive website using HTML, CSS, bootstrap, JavaScript, Node Js, Express Js, and React UI library
- Wrote, tested, and deployed high-quality code that is optimized for performance and scalability
- Developed and maintained databases, APIs, and other back-end services
- Ensured that the web application is responsive across different devices and screen sizes
- Debugged and troubleshooted issues that arise during development and after deployment
- Participated in code reviews and provided constructive feedback to colleagues
- Collaborated with designers to ensure that the UI/UX of the web application meets user needs
- Maintained and updated documentation for the codebase and the web application

## PERSONAL PROJECTS [robel26.com/#portfolio](https://robel26.com/#portfolio)

- Built **Amazon-clone** using react and firebase, the world's largest e-commerce store with full functioning online payment method, front and back end.
- Built **Netflix-clone** using react, online movies, and tv shows streaming service.
- I recreated **Apple's current website** using react-created react components for various pages and sections with full functional routing. I integrated Apple's YouTube channel and the latest news using REST API.
